COLORADO SPGS, CO 80906

Site: 001

CHEYENNE MOUNTAIN ZOO. PARK

Inspection
Type: ROUTINE INSPECTION
Date: NOV-03-2004

3.75 (e)

HOUSING FACILITIES, GENERAL.

3.75 (e) Storage...Substances that are toxic to the nonhuman primates must not be stored in food storage and preparation areas, but may be stored in cabinets in the animal areas.

Toxic substances (bleach) are being stored in the food preparation areas for the nonhuman primates in the birdhouse and primate world. Substances toxic to non human primates need to be stored away from the food storage and food preparation areas to prevent possible contamination of non human primate food.

To be corrected by: November 8, 2004

3.125 (c)

FACILITIES, GENERAL.

3.125 (c) Supplies of food and bedding shall be stored in facilities which adequately protect such supplies against deterioration, molding, or contamination.....

Two bones in the refrigerator in Asian Highland Area food preparation area were exposed directly to the elements... Frozen bones in the outside commissary freezer and the freezer below the giraffe enclosures are in cardboard boxes with holes that allow exposure to the elements. All bones being stored need to be protected in a manner (sealed or wrapped) that prevents deterioration.

To be corrected by: November 9, 2004

Commissary dock door had an opening at the bottom large enough to allow mice to enter the building. Under the guinea pig food bag was evidence of rodent droppings. Food storage facility needs to be maintained to prevent entrance of vermin.

To be corrected by: November 9, 2004

Inspection accompanied by (b)(6), (b)(7)(c) and Richard Watkins, USDA, SACS.
